

TIME TRACKING

In times of increasing networking and cross-departmental teams, the nature of value creation is also changing to an increasing extent. Working time is no longer only performed on the store floor, but also in the office, on the way to the workplace or somewhere in between. To simplify the registration of this valuable time, we have implemented a way of recording working hours, planning staff assignments and processing shifts in the LISA system. Our digital time tracking is customizable based on location. Small teams or entire shifts can be organized here, or vacation requests and overtime can be tracked. Possible unforeseen staff shortages can be responded to immediately and event-related.

Extension module: Time Tracking

Record the exact working time, whether on the factory floor, in the office or home office. Plan shifts, note sick days or reorganize entire shift schedules, regardless of location and without loss of time from anywhere.

Easy to use

to the minute

AT A GLANCE

Release: 2021

Location independent: Use from home as well as from the office

Accurate registration: minute-by-minute recording of working time possible

Sustainable: Shift schedules & times are stored and archived in the LISA system

Implemented in LISA: no additional software required

Server from Germany: German or European data protection guidelines apply

Requirement: LISA account, incl. access data, possibly RFID chip + scanner

Status: April 2023
